EDUCATION

Gurukul Kangari Vishwavidyalaya Bachelor of Engineering, Computer Science, GPA: 7.5 The Gurukul Nilokheri Class XII, Percentage: 75.8	Uttarakhand, India Dec 2020 - Jun 2024 Haryana, India Apr 2019 - Mar 2020
--	--

SKILLS SUMMARY

- **Languages:** Java, SQL
- **Frameworks:** Spring, Spring Boot, Spring MVC, Spring JPA, Spring Security, Spring Cloud, Jakarta EE
- **Technologies:** Java 8: Lambda Expressions, Stream API, Optional Class, JSP, Servlets, JavaFX, JDBC, RESTful APIs
- **Tools:** MySQL, SQLite, Maven, Git, Postman
- **Platforms:** Eclipse, Visual Studio Code, IntelliJ IDEA

WORK EXPERIENCE

Junior Software Engineer (Intern) Agavian Software Technologies Technologies: Spring Boot, AWS S3, REST APIs, JWT, iText PDF, MySQL, Swagger. Spearheaded 15+ REST API development for enterprise job portal supporting candidate-employer interactions. Pioneered AWS S3 file management system for secure document storage/retrieval. Established end-to-end job lifecycle management with application tracking and notification workflows. Crafted dynamic resume generator using iText PDF templating for candidate profile exports. Instituted role-based access controls for multi-user profile management system. Integrated Swagger documentation reducing onboarding time for frontend and QA teams. Coordinated Agile sprints delivering OTP authentication and real-time dashboard features.	Mar 2025 - May 2025
--	----------------------------

PROJECTS

Insurance System for Health LINK Architected a comprehensive microservices ecosystem for end-to-end health insurance application processing. Implemented JWT authentication at API Gateway with role-based access control and BCrypt encryption. Engineered 12 Spring Boot microservices with Spring Cloud for discovery, configuration, and fault tolerance. Optimized JPA/Hibernate data persistence across multiple domain entities in a shared MySQL database. Established secure API design with standardized error handling and comprehensive endpoint documentation.	Mar 2025 - Apr 2025
CineTicket: Movie Reservation System LINK Orchestrated RESTful API development with Spring Boot for movie review and reservation system. Implemented comprehensive movie review system with rating and feedback capabilities. Enforced authentication security using Spring Security with JWT token validation. Embedded Swagger OpenAPI documentation for comprehensive endpoint exploration. Integrated Stripe payment gateway for secure online ticket transactions and webhooks for real-time payment status. Established role-based access control with review ownership validation mechanisms.	Jan 2025 - Feb 2025
Banking Web Application LINK Constructed a robust web application using JSP, Servlets, and JDBC within an MVC architecture. Leveraged MySQL for efficient and secure data storage, ensuring high availability. Formulated features for account management, transaction handling, and complaint submissions, handling mock data. Enhanced modular components, reducing development complexity and time.	Nov 2024 - Dec 2024

CERTIFICATES

Java Hacker Rank Demonstrated proficiency in Java programming, including object-oriented principles and design patterns. Successfully solved complex algorithmic challenges and optimized code for efficiency.	Nov 2024
SQL Hacker Rank Acquired expertise in database design, query optimization, and managing relational databases. Applied SQL optimization techniques for high-performance query execution.	Sept 2024
Linux System Administration with IBM Power Systems edX Acquired advanced system administration skills and expertise in IBM Power Systems. Learned advanced skills in IBM Power Systems, including virtualization, networking, and performance tuning.	Aug 2023
